DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Drawings

2. Figures 1 - 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

3. Claims 1 – 10 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: As to claim 1, the prior art fails to show an impact induced pulse sensor wherein the guiding means affecting the speed such that for impacts with the like pulse areas the measuring voltage vs. the distance is independent from the duration of the pulse shaped impact. This feature taken together with the other limitations of the claims renders the claims allowable over the prior art.

Prior Art of Record

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
6. Meister (5,608,270) is cited for its disclosure of a vehicle safety restraint system with linear output impact sensor.
7. Shannon (5,723,789) is cited for its disclosure of an impact responsive sensor.
